Targeted in-meeting notification

Targeted in-meeting notification (Developer preview) allows apps to send notifications to specific participants on a meeting stage. The notifications are private and are sent only to specific or targeted participants. Targeted in-meeting notification helps to enhance meeting experience and develop user engagement activities in Teams meetings.

A photograph showing three people in an office hallway. A woman in a light grey sweatshirt and beige pants points towards a whiteboard with her right hand. A man in a black t-shirt and blue jeans stands to her left, looking at the board. Another person, partially visible behind her, also looks at the board. They are standing next to a wooden cabinet with a small logo on it.
